

COLVILL PARK CONCEPT

COLVILL PARK CONCEPT OVERVIEW

Colvill Park boasts many picnic shelters, an indoor event facility an aquatic center, a universal playground, trails, a concessions stand and a number of passive and active recreation opportunities. The park's natural amenities include limited topography, mature tree cover, and multiple points of access to the water for wildlife viewing. The park's existing assets provide a number of issues and opportunities for future improvements.

THE COLVILL PARK CONCEPT WORKS ON:

- Enhancing existing recreational opportunities with areas for lawn games and a natural adventure park
- Integration of a river-side amphitheater with connection to the concession stand and parking
- Conversion of existing parking areas for tournament-style pickleball courts
- Enhanced stormwater management through green infrastructure throughout parking areas
- New event pavilion to enhance weddings and other large events
- Providing more passive recreation opportunities with connected walking paths and the introduction of bike share within the park
- Enhancing water access with fishing piers, shore fishing platform and birdwatching tower
- Providing a variety of shade structures around the pool area and taking advantage of existing lawn space

WHAT DO YOU THINK?

Place dots on the boards and share your thoughts using a comment card and/or the sticky notes provided:

I like this!

This could use some work.

What about this idea?
